PARKER'S OFF COLOR ATTACK

Alton Parker, Wall atreet's dependent on another, makes it Democratic sacrifice for the presihis Wall street instincts, to an attack on the Socialists. When there is a capitalist lawyer on the job you may generally look for tricks, and in this instance Parker plays a little game on us by presenting among other things a garbled quotation from Marx and Engels:

At the national convention of Catholic societies just past In Milwaukee an effort was made to get an endorsement for the Common Cause and like publications devoted to defaming Socialism, and when the battle seemed lost Davy Goldstein, of Widow Avery fame, made a fearful appeal on the ground that wherever he went he found that thousands of men looked to those periodicals "for their arguments against Social (He might have added that the men back of the Common Cause had been on the payroll of the National Manufacturers' association, vide the Mulhall disclos-And it is from this unstraight source that our worthy patriot (for pelf), the Hon. Alton Parker evidently got his chief javelin thrust at us for his speech before the Ohio lawyers.

Here is what Parker said about

"In every city and hamlet the people came together on the Fourth of July to listen to a reading of the Decisration of Independence and an oration extolling the wisdom of the fathers who had so wondrously devised a government of the people the like of which the world had never witnessed.

growth of the doubt whether after all the founders of our government builded wisely.

"I shall not attempt to measure the extent of the change in the mental attitude of vast portions of the people. The task would be beyond me should I attempt it: aye, beyond the ken of any man. But he is slow to observe who is not aware that the change is very great; for it is evident on every hand...
"In open hostility to the underlying principles of our constitutional government, an organization, the sim of which is clearly defined as "The establishment of a system of society based on the common ownership and democratic conirol of the means and instrumente for producing and distributing wealth, by and in the interests of the whole community, marched to the polis last year with an army of over 900,000 men. This body of Socialism seeke to undo our system of government. Its root icea is that all means of production, transit, etc., should be owned exclusively by the state, and all property, wealth, etc., should be ad ninstered by the state, and on a different of Socialism (the C mmunist Manifesto) the family is to disappear with the private right of property. That manifesto states the proposition in these words: 'On what foundation is the present family hased? On capital; on private gain. In its completely developed form, the family sites only among the bourgeois. This family will vanish as a matter of course when its complement vanishes, and both will vanish with the vanishing of capital.' These vandals, upon the theory that whatsver is is wrong, frankly declare war on every sacred, tested and honored institution, symbol and hope...
"Multitudes are becoming addicted to the imblining of the restless mixture of Socialism, anarchy and sedition dispensed by those who seek to lead the industrial class into violence and trouble."

So says Lawyer Parker. What is the suswer?

The Mauifesto was written as the platform of the Communist

League, way back in 1848 - 65 years, over half a century ago. It was written by Marx and Engels, who were also virtually the founders of modern Scientific Socialism. The work reviews the entire status of the working people under capi-talism, and thus takes up the home life of the proletarians, the marital lives of the bourgeoisie, the capitalists, with a scathing exposition of the immorality of capitalism and all its unclean relations, in which also it exploits the working class, and by example and eco nomic compulsion demoralizes it.
The trick in the case of the

quotation used by Parker consists in leaving out three words almost at the start, by changing a word a little further along, by leaving out 22 words still further along, and by two further changes in the text made necessary by this garbling. Let us see.

Turn to the quotation as Parker gives it. The first sentence of the quotation should read: "On what foundation is the present family, the bourgeois family, based? The words here printed in black type, were left out, thus changing the meaning of the quotation in toto. Further on, where it says "the "family exists only among, etc.,"
the "the" reads "this" in the origi witnessed.

"How the times have changed!...
Indeed, a national party, hostile to
our form of government, polled more
than a elxteenth of the votes cast a
year ago. And he is slow of observation who faite to notice the rapid
growth of the doubt whether after

"thia" has been changed to "the,"
and this whole sentence has been
dropped: "But this state of things
finds its complement in the pracnal, referring to the particular tical absence of the family among the proletarians (that is, adequate normal family life), and in and prostitution." Then follows: "The bourgeois femily will vanish, etc." but Parker managed to cuaningly leave out the qualifying word, the word "bourgeois." What do you think of such knavery?

The purpose of the quotation, of course, is an effort to make it appear that Marx and Engels wished to have all family life wiped out in favor of promiscuous relations between the sexes, whereas they take no such stand. We may introduce a further quotation from the Manifesto here to show with what a keen thrust they in anticipation, turn such a slander upon their possible traducers. Thus they say:

But you Communists would in-

It was a dispatch announcing the arrival of Cardinal Gibbons for the arrival of Cardinal Gibbons for the cardinal thinks we do and that is cardinal thinks we do and that is esting reading:

Does Not Score Socialism.

Cardinal Gibbons did not score Socialism when asked what he thought about the political beliefe of nearly one-half of Milwaukee's population. He said that there were good and had things in Socialism, and if the had ones could be removed then there would be no objection to that faith. His strongest objection was against common ownershit which, he said, would destroy in "cual ownership. His eminence strongly favored labor organization.

There is something energingly.

There is something aurprisingly temperate in the above, so temperate that one, even in spite of past experience, might be inclined to take the aged prelate at his werd. Passing by the interesting fact that in the New Testament time Christians believed in common it is to be presented acquires; ownership which he is now so strongly oppossed to, it is clear that the statement on its face shows a misunderstanding of the fundamentals of Socialism. The common ownership we be-lieve in is the common ownership of the means of production and distribution, and we believe in it for the very reason that we want the people to own private property. We want them to have what they produce instead of losing it as at ploit them to the limit through awaing the industries. We want the working class to be the well-to-do class because of their in-

it is to be presumed that the car-dinal, if pressed for further objec-tions, would fall back on those old moss-grown slanders against Socialism as being in favor of im-morality. Think for a minute of capitalism being set up as the

mainstay of morality! Socialists have shown that morality is simply impossible under the capitalist system. And every day the situation grows worse and more abominable. To the discerning the plight of the Catholic societies meeting in Milwaukee was almost pitiful. Most of their reso-lutions were aimed at the immoralities of capitalism, without daring to charge the filth up to its

proper source. Our centers of civilization today are simply vile. Even the Carholics who take their stand ou the side of capitalism are almost overwhelmed by the capitalism's stench.

Every city under capitalism is a sink of depravity; a fetid, immoral Socialists are vandals in the eyes air pervades the people's amuseof a Parker, because they want se ments, the situation of the home was never in such peril as now, and

Church spires multiply, also red hats, but the filth mounts higher, and higher. It cannot be otherwise while the principle of capitalism-each man for himself and to the Devil with everybody elserules the fives of the people.

And for daring to attack all this and point out the cause, certain clerics with capitalist minds fabricate charges against the Socialists of being against purity! Some of these chaps need to do a lot of confessing to clear their souls.

We do not expect the cardinal to come out for Socialism, but we think he ought to avoid misrepresenting our aims.

During the convention of the Catholic societies in Milwaukee the street sales of the Milwaukee Leader abowed a noticeable jump. It appears that while the leaders in the convention were slamming Socialism the rank and file was anxlous to see what the Socialist daily had to say. They probably read enough to see that their spiritual advisors were entirely in the wrong on economics.

WONDERFUL TEXAS ENCAMPMENT

GRAND SALINE, Texas—Socialists in this section of Texas will hald their tenth annual encampment Aug. 18 to 21.

BY OSCAR'AMERINGER.

When the church became state church and the most powerful tool of despotism and exploitation, in history, it looked as if communism had reached its end. But not so.

For the first three centuries Christianity was a city religion. The word pagan, from the Latin paganus, with which the Christian designated the nonbelievers, means "village dwelliers". Christian communism falled in the cities because the means of production could only be used individually. It was different when the new faith invaded the rural districts. There communism found a fertile soil.

Froduction on a large scale had provailed on the clave estates. As the supply of slaves gave out, this system of production broke down.

In its place arose monastic production. About the time when Christianity was recognised as the state church, the first convents came into existence. Starting first in Egypt, they soon spread over the Christian world.

With none of the cheap tricks that the English speaking world has come to associate with the word, he was the greatest of politiciaus. architect himself, but the other portions of the structure are not lack-He saw the resistless power that had been unwittingly granted to ing in grandeur, and the foundations are visible today wherever there labor through universal suffrage and parliaments. He saw also is resistance to oppression and aspirations for freedom.—The Milwauthrough the trickery and deception by which the ruling class has sought to neutralize the power so granted, and he cut through that deception, laid his foundations upon the democratic organization and thorough education of those who cast the ballots, and built up the mightiest machine ever controlled by isbor-the Social-Democratic party of Germany.

He did not stop with the election. He had long been looked upor by friends and enemies alike as the foremost parliamentarian in the world today. His progress along the road to that eminence was marked by the political tombstones of those who opposed him, and among these the memorial that marks the political grave of Bismarck towers

He never lost faith in political action. In defense of that method of fighting and the tactics he knew would make it effective for his class, he dared to stand in opposition to Marx and Engels, when he so strongly partisan of one faction that he had been named the "Eisenmacher," was working to unite the divided forces of the German working class. He had his only serious disagreement with Liebknecht, to whom he owed his conversion to Socialism and much of his education, when that "old Hussar" grew impatient with the ballot box and sneered at parliamentary action. He stood firm against Most and "Die Jungen," when persecution and "Laws of Exception" had driven the more impulsive to the weapons of anarchy, and was justified in his position when he was taken from the prison cell to lead the battle in the Reichstag that took Bismarck, the author of those laws, from the Reichsung and the cabinet and sent bim into political exile.

The great general of the hosts of Labor, he always led them in defense of prace. When triumphant Germany was drunk with blood and patriotic irenzy at the victorious close of the Franco-German war. he dared to rise in the Reichstag, attack the annexation of Alsace and Lorraine, pointing out with prophetic insight the beritage of bate it would bring upon Germany, and, most daring of all, at a time when all Europe was ringing with the calumnies against the Communards, he fearlessly defended their fight against tyranny, and equally regardless of criticism within his own ranks, he did not hesitate to point out the mistakes of that uprising."

It was this speech that Bismarck characterized as a "ray of light" warning him that Socialism is a challenge to capitalism that must be met and overthrown, if capitalism is to live. Bismarck took up the challenge. He sent Bebel to prison. He outlawed the army that followed him. He, the leader of the "Kulturkampf," "went to Cannossa" and invoked and received the aid of the Catholic party he had denounced, to gain allies with which to crush Socialism, and then was himself sent into political exile because he failed to stop the irresistible march of the hosts that rallied around Bebel.

He jost sight of no phase of the proletarian battle. His was the first voice to be raised in the ranks of Socialism in full recognition of the necessity of including the hitherto disregarded half of the human race in the fight for freedom. The tow down the river to the ship was quite exciting on account of the speed and ohoppy see, over which the gig stimmed at the rate of seven or eight knots. It required skillful steering to avoid getting towed under or expelsed. Next moraing a lighter came alongside with coal and other stores which were taken on board. Also a saluting battery of two small braze breach, leading guns were received here. Then an expert came with some trained ferrets and the ship was cleared of rate.

The ir side of the Paterson strike is now getting to the outside. The long and short of it was that the great struggle was ridden to disaster by the irresponsibles of the L. W. who fastened upon it as a good chance for fame and power and free meals at labor's expense. It appears that these parasites kept the strike going by taking the stand that there should be no settlement until the manufacturers in a body requested it. Some of the concerns wanted to settle, but the larger ones did not, it being to their interests to have their competitors put on the rocks. The bigger fellows with mills, elsewhere, some even in Europe, could shut down and smile. In fact it is now conceded, by Alexander Scott and others, that the big manufacturers with benefitted by the strike. All this may seem like lunkhead tactics, but it was foxier than that. The longer the strike the longer the I. W. opportunity. Jacob Panken has thrown some light upon the affair. He reports that a day or two after the walkout a number of manufacturers applied for settlement, but as it was a sympathetic strike there were no demands to present, except that there should be no introduction of the three and four loom system. LONDON, England.—The Catholio bithop of Northampton, the Rt. Rev. Dr. Keating, paid a powerful cribute to the Labor perty at the annual meeting of the Catholic Social guild held at Plymouth recently.

The cold, Godless, economic science of the early Victorian days," the bishop declared, "is dead, buried and dammed, Moreover, the industrial class has done the very best thing it could do by taking its own interests into its own hands. It has organized itself, and its organization has grown by leaps end honnds, and has become a great power in the world, comparable only to the rival power of accumulated wealth."

The people, Dr. Keating proceeded, had sent to parliament a Lubor perty, and he thought every one ought to be very well satisfied that such a large class and cuch a suffering class should be represented in the house of commons. On top of that (and because of 1:) the interests of the laboring class had necessarily been considered by every political party.

Not only the Labor party, but every party in parliament and on, of parliament was yieling with the other in not settle with individual mills. They said they would get a big hall and have the manufacturers on one side of the room and the workers on the other and stage a mammoth settlement scene. And so the twenty-two weeks of starving for the thousands of workers went on with the Haywoods and Gurleys in

In the death of August Bebel the Social-Democrats of the world have lost a great leader, the influence of whose work was felt wherever the international party has penetrated. And yet fate was kind to Bebel, for it gave him a long life, with time to help train others to take up the work when he would be no longer at the helm. Both he and the great Liebknecht lived to a ripe age-as age goes under our present "civili-

CO-OPERATION IS THE KEY.

The day of individualism has passed.

Association, combination and co-operation is the order of the day. The powerful Socialist press we now have has been made possiole only through the co-operation of tens of thousands of Socialists scattered all over the continent,

Our movement seems to be grow-ing too fast for our efficiency. The ing too fast for our efficiency. The people are calling for the experienced organisers and speaters who understand the fundamental principles of Socialism. The people are thinking and they want thinkers to lead them. It takes more than good will and enthusiasm to accomplish anything for the party today. An organiser must be one who knows organising either through personal experience or study; a speaker must be one who have the season of Socialism and art of epeaking in two ways; one way is the expensive and less practicable; the other inexpensive and more practical. He can matriculate at a college for three or four years at a cost of about \$200 to \$400 each year, (which is out of the question with a great many of the young people), or ha can get it at a cost of a few cents a month. The latter way is the most practical and extremely cheaper and profuble.
